HICKSVILLE, LONG ISLAND

ROSES

We are now offering a large diversified selection of Roses, including:

HYBRID TEA ROSES — Not only the most useful for the garden display but the beautifully shaped buds and open blooms make them the finest of all roses for cut flowers. They grow with the greatest of ease and with proper protection during the cold season, will continue to bloom year after year. Our selection includes all the popular colors and shades.

CLIMBING ROSES — The ideal rose for training on pillars, arches, trellises or into any position the gardener wants them. They bloom profusely in the summer and develop colorful bunches of beautifully shaped blooms.

All Kroemer Roses are 2 year field-grown plants. Careful supervision of the growing, digging, warehousing and grading of all stock insures your getting the best in Roses.

EVERGREENS

For foundation planting and general land-scaping. They give relief to lighter vegetation and the warmth of color to the Winter scene. Evergreens can be developed into masterpieces of plant life and are worthy of your deepest interest. A large selection available.

FLOWERING SHRUBS

The following partial list of flowering shrubs are available for shipment from our stock in Hicksville.

ALTHEA, purple	LILAC, purple
ALTHEA, red	WEIGELA, Eva Rathke
EUROPEAN CRANBERRY	WEIGELA, Rosea

Flowering shrubs have many of the good qualities of garden flowers with less insistence on perpetual care. They require much more room but they play a larger part in the landscape scene.

LAWN GRASS MIXTURES

CHOICE OF SEED

Avoid cheap lawn mixtures whenever possible as they are apt to contain light unproductive seed. The labor in preparing the ground along with the fertilization remains the same. The slight cost of a good mixture over a cheaper mixture is well repaid in beauty and lasting qualities of a lawn.

A lawn is built up to serve the "home beautiful" with pleasant surroundings and it will in every case show true economy to build it of the choicest mixtures.

Honor Bent Mixture—This is the best mixture obtainable at its price. The mixture consists of Kentucky Bluegrass, Fancy Redtop, Chewings Fescue, Pacey's Ryegrass and South German Bentgrass. These ingredients are mixed in the proper proportions to give the lawn the fineness and toughness that is needed in every condition. The mixture is built up especially for us by one of the oldest houses in the grass seed business.

1 lb. \$1.25 10 lb. bag \$12.00 100 lb. bag \$100.00

Extra Choice Central Park Mixture—Our grass seed business has been built up on our reputation of this mixture. It is a mixture

that contains the better grasses. The Varieties are all adapted to our climate and produce a lawn that is adapted to general lawn conditions.

1 lb. \$1.00 10 lb. bag \$9.50 100 lb. bag \$85.00

Gramercy Park Mixture—Contains grasses that grow very quickly. It is a very fine mixture except that it does not have the finer grasses that are contained in the Extra Choice and Honor Bent Mixtures.

1 lb. .75 10 lb. bag \$7.00 100 lb. bag \$60.00

Shady Lawn Mixture—This mixture is blended with the finest grasses that will do very well in shaded areas. It is essential to plant a shady mixture in locations that receive little or no sun, as these locations are usually around trees which absorb most of the moisture. The mixture includes grasses that thrive under these conditions.

1 lb. \$1.00 10 lb. bag \$9.50 100 lb. bag \$90.00

Note—We can supply the above mixtures with or without White Clover.

Quotations on request on all field seeds such as: Timothy, Red Clover, White Clover, Redtop, Fescue, Millet, Ryegrass, Bluegrass, Canada Field Peas, Soy Beans, Orchard Grass, Sudan Grass, Bentgrass, Rye, etc.

All orders and prices subject to confirmation.

BUILD UP YOUR SOIL
if you want BETTER CROPS - A Greener LAWN
More Gorgeous FLOWERS

Poor results in gardening are usually due to poor soil, which is either too heavy, too loose, too wet, too dry, or too starved of humus and essential food matter. If you want better crops use

NETTOLIN

The soil-building fertilizer that provides a perfect balance of humus, plant food and lime — all at one time.

NETTOLIN is superior to more than ten times its weight of well-rotted cow manure. Produces strong and healthy roots and stock, holds water, aerates, binds loose soils, crumbles heavy soils, promotes microbial life, reduces danger of pests and plant diseases. NETTOLIN is derived from high-grade com-

posted German peat and rendered non-acid. Is an excellent activator, and absolutely free of all weed seeds.

Your lawn will be greener and thicker, your flowers will be bigger and have a richer color, your vegetables will be more bountiful and have a finer flavor, if you use NETTOLIN each Spring and Fall. Enthusiastically endorsed by leading commercial growers and agricultural scientists.

SEED TREATING

ROOTONE

Reg. U. S. Pat. Off.

Rootone—The plant hormone powder for cuttings, seeds and bulbs. Most cuttings not only root faster when treated with Rootone but develop larger root systems that enable them to mature to greater perfection. Rootone treated lawn grasses have proven to make more permanent luxurious lawns. Authentic tests in past year show that Rootone treated seed produces 2 to 3 times heavier turf than untreated seed. The resulting grass is deep-rooted and more drought resistant.

Use **DITHANE**

DITHANE is the time-proved organic fungicide that controls potato blight without the vine-stunting effects of copper fungicides. And every grower knows it takes big vines to grow a big crop.

Available as a convenient, non-clogging spray or as a free-flowing dust, DITHANE has been thoroughly proved on thousands of acres of potatoes from Aroostook County, Maine to California.

USEFUL FOR VEGETABLES

If you grow cucumbers, tomatoes, or lima beans, you will like the way DITHANE works on these crops. Here again it's a combination of effective disease control plus safety to foliage, blossoms and fruit.

IF YOU SPRAY _____

Use DITHANE D-14 — 5 gallon cans and 30 gallon drums or DITHANE Z-78 — 3 pound bags, 16 per case.

IF YOU DUST _____

Kroemer's DITHANE dusts, made with DITHANE Z-78 are accurately formulated to meet your needs.

CASE "VAH" HIGH CLEARANCE TRACTOR

See this high clearance Case tractor with its 3-point "Eagle Hitch" for easily attached hydraulic lift implements. A dependable 2-plov tractor with four forward gears, providing working speeds from a creep to nearly 5 miles per hour, a road speed of almost 10 miles per hour. Swinging draw-

bar, differential turning brakes, hand and foot throttle, electric starter, steel platform, rear wheel fenders, variable speed governor. Front wheel tread adjustable from 61 to 85 inches, rear 60 to 88. 27-inch row crop clearance. Low pressure hydraulic pump driven direct from engine — always operative whenever engine is running — control permits accurate positioning of all equipment.

Mounted implements available.

CASE "SC" FULL 2-PLOW TRACTOR

A Case "S" series tractor gives you the flexible, efficient power you need to handle every job faster, better, easier.

CASE "DC" 3-PLOW TRACTOR

Here's a dependable 3-plov tractor for row crop work. Available with single front wheel for added crop clearance or with a wide adjustable front axle, standard 4-wheel or orchard models. Rear wheels of row crop models easily adjustable from 48 to 96 inches. Complete assortment of mounted implements for wide variety of work. Power at drawbar,

power take-off, belt pulley. Foolproof low pressure, two-way hydraulic control unit operates at all engine speeds. Raises, lowers and holds implements at any desired position. Full swinging drawbar, toe-touch assisting brakes. Synchronized steering for quick dodge cultivating. Durable tractor type 4-cylinder engine with 3 bearing crankshaft, drop-forged connecting rods, many-fuel manifold, fuel saving carburetor, magneto ignition.

CASE "LAE"

Irrigation engine units. 61 horsepower. Sets a world standard for endurance. Equipped for gasoline or heavier fuels. Let us tell you about this remarkable engine.

CASE CENTENNIAL TRACTOR PLOWS

When introduced in 1937 to celebrate 100 years of plow building, Case Centennial Plows opened a new era in plow performance. Users quickly found that Case Centennials were unusually easy to set for high quality plowing. A quick-acting high level lift raises bottoms from 6 in. deep to 6 inches clear without lever

adjustment—9 inches using levers—to clear trash on turns. Extra space under beams and between bottoms insures easy, clean plowing in trash. Bottoms built for trash coverage and pulverizing at high plowing speeds. Landside pressure is carried on large, easy rolling wheels thereby decreasing draft and fuel consumption. Easy reach levers give close depth adjustment. Heavy high carbon steel axles and double-headed, heat treated beams insure long life. Available in 2, 3, 4 bottom sizes with 12, 14 or 16-inch bottoms.

CASE HEAVY DUTY "JA" DISK HARROW

When soils are stubborn, disking is difficult, and extra weight and strength are needed for better penetration and pulverizing, a Case "JA" Disk Harrow has what it takes to

do the job right. For fields and orchards, whether clean or in cover crops, and any type of soil; ample flexibility for working over uneven ground; extra strength and weight for tough going. Can be equipped with weight pans for additional weight. Sturdy Steelite bearings and heat-treated large diameter disk blades for long life. Available with disks spaced 7 or 9 inches apart. Angled by backing tractor or can be equipped for hydraulic ram operation. Widths of cut from 4 feet 8 inches to 9 feet 8 inches.

CASE SOIL CONSERVATION DISK HARROW — "R" Series

Oilbath power control or hydraulic row provide angling and straightening "on-the-go" for crossing grassed waterways and saving time in the field. Greater clearance for

working in trash. Rear gangs so braced that disks always cut between front disks even on turns and slopes; no drifting on hillsides. When straightened, the front and rear gangs are always parallel regardless of working angle. Rear gangs can be set at various angles, independent of front gangs to meet different requirements. Extra strong but flexible steel frame with built-in weight boxes. 18-inch disk blades, Steelite bearings, oscillating scrapers, pressure lubrication. Available in 5, 6, 7, 8 and 10-foot double disk sizes.

FERGUSON EQUIPMENT

THE NEW FERGUSON MANURE SPREADER

All steel (except flooring), three-inch channel main frame to provide ample strength for rigidity and heavy loads. Width 73-inch clearance, height loading 36 inches, transport 40 inches. Floor, wood, grade A clear, matched vacuum creosote impregnated with 6 to 8 pounds of creosote per cubic foot of lumber. Wear resistant and replaceable. Coating zinc chromate primer plus a synthetic rubber plastic coating applied to all metal surfaces on the inside of the box, provides a hard, pliable, wear resistant protection against corrosion. Capacity 70 bushels. This spreader when used along with the Ferguson loader, one man and one tractor can load and spread continuously without the operator leaving the seat of the tractor.

TANDEM DISC HARROW

See the Ferguson disk harrows, the Ferguson System makes the difference. Finger control does all of the work of controlling the angle of the disks. Move the lever forward and the disks go into angle, backward and they straighten. You do this without stopping the tractor or looking backward.

FERGUSON NKO CULTIVATOR

JUST WATCH THE ROW AHEAD, steering guide on the front axle which you set over one row when tractor and cultivator is centered provides for accurate steering, thus you have only one place to watch. The Ferguson System makes possible the effective combination of easy driving with the better work of rear cultivation. Just try a Ferguson cultivator and prove the difference in improved quality work to your own satisfaction.

IRON AGE POTATO DIGGERS

IRON AGE ONE-ROW POTATO DIGGER

Designed for simple, easy, one-man operation, the rugged, new Iron Age One-Row Potato Digger is your assurance of a greater yield of unbruised, unmarked potatoes per acre. Chain on the digger is made up of 132 heat treated spring-steel links. Length of the digger bed is 94 inches. Elevator available in 34" and 26" widths. Direct tractor hitch is standard equipment.

TWO-ROW IRON AGE POTATO DIGGER

This is a combination of two single-row diggers, efficient, economical and reliable. Digger unit is adjustable for 30" - 36" and 36" - 42" row spacings. Each individual digger can be adjusted for depth by hand levers or by hydraulic controls as desired. Type and size of chain and widths and lengths of bed same as in the one-row digger. Standard two-row digger is fitted for power take-off drive and hydraulic raising and lowering arrangement is available as extra. Because of the helpful suggestions of growers from Maine to California, the Iron Age Potato Diggers are your nation's number one digger. See these diggers before making your next purchase. It is a single cylinder, four-cycle, air-cooled motor. It has an SAE rating of 5 horse power Tractor with pneumatics and HT gang and GT-2 cultivator equipment as illustrated.

\$439.00

HT-63 Disc Harrow—A Disc Harrow is unquestionably the best all around tool to follow up the plow to cut up the soil and clods and pack and level the seed bed. Equipment consists of hitch and two sets of discs.

\$69.50

HT-57 Field Mower—For the farmer who has given up his horse and who has a moderate acreage of hay or alfalfa, the "Planet Jr., Field Mower Attachment is a mighty useful accessory. Having a 46-inch cutter bar, this machine will cut from four to five acres a day, at a cost of from 50 to 60 cents for fuel. Height of cut is adjustable from 1 inch to 5½ inches. Side draft is eliminated by using two drive wheels on the right side of the tractor and when using rubber tires by reflatting the left. The mower is best driven and therefore acts as a clutch and prevents breakage when cutter bar encounters sticks or stones. Cutter bar can be held in a vertical position when transporting.

IMPLEMENTS AND EQUIPMENT

"Planet Jr." Seed Drills and Cultivators

NO. 4 COMBINED DRILL

(Not Illustrated)

No. 4 is a Hill and Drill seeder, cultivator and plow combined. Holds 2 quarts and sows all garden and field seeds continuously or drops in neat hills either 4, 6, 8, 12 or 24 inches apart. The attachments comprise 1 Plow, 2 Hoes, 3 Cultivating teeth and 1 Leaf Guard. \$34.95

NO. 300-A DRILL SEEDER

A very efficient, easy running, accurate plate seeder for the market gardener and large vegetable grower. Will work in any soil—heavy, sandy or muck. There are 39 holes in the plate varying from one-tenth to three-quarters of an inch. The plate is easily shifted from one hole to another by lifting a spring lever and turning the plate. Hopper has a capacity of four quarts and is detachable. \$34.95

NO. 300 DRILL SEEDER

(Not Illustrated)

Desirable for planting in muck, as it has an 11-inch rear wheel with 2½-inch flat face. This makes the seeder push more easily in the light fluffy soil. \$34.95

JIFFY SEEDER

Desirable for the home gardener. Does away with the drudgery of planting by hand. It plants vegetable seeds from the smallest up to the size of kidney beans evenly and accurately in straight narrow rows, which means easier and better cultivating. The hopper holds a pint and one-half of seed but handles a five cent packet as well as a hopper full. It opens the furrow, drops the seed, covers and rolls it all in one operation. \$19.95
